The doctor tells him the muscles at the base of his penis are broken down and there is nothing he can do unless he wants to try an experimental surgical procedure. The guy asks what the procedure is. The doctor tells him they take the muscles from the base of a baby elephant trunk, and insert them in the base of his penis, and hope for the best. The guy says that sounds scary but the thought of never having sex again is even scarier so go ahead. The doctor goes ahead and performs the surgery and about 6 weeks later tells him to "try out his new equipment". The guy takes his girlfriend out to dinner. While at dinner he starts to feel and incredible pressure in his pants. It gets incredibly unbearable and he figures no one can see him so he undoes his pants! No sooner does he do this than his penis pops out of his pants, rolls across the table, and grabs a dinner roll, and disappears back into his pants. His girlfriend sits in shock for a few moments, then gets a sly look on her face. "WOW!" She says, "That was pretty cool! Can you do that again?" With his eyes watering and a painful expression on his face, he says "Probably, but I do not know if I can fit another dinner roll up my ASS."</p> <p>old63</p> <p>----- davidguyer</p> <p style="text-align: right;">IP: Logged</p>
